About Eco-Panda: *Waves of Change...* **Eco-Panda** swimwear is composed of **MIPAN® regen™** recycled nylon, which is created from post-consumer fishing nets. The recycled fishing nets are ground into fabric chips, which are then liquefied, creating fiber, which in turn is spun into fabric. By utilizing recycled nylon, *greenhouse gas emissions are reduced by 28%* and the *consumption*

of our natural resources is reduced by 27%. This process also reduces the lack of available landfill space. **Eco-Panda** is committed to providing fashion-forward swimwear with uncompromising quality. Blending global trends with recycled resources and unsurpassed fit, **Eco-Panda** swimwear is more than this season's trend, it's a fashion essential. Welcome to the future of style....**Eco-Panda**.
